

### Technical Description

On complex, multi-antenna, multi-band communication platforms, Comrod's Antenna Marking System ensures the correct whip element is installed onto the correct base. Matching colored rings are fitted over the antenna base and whip to quickly identify each antenna assembly.

- Colored silicone rings
- Easily retro-fitted onto existing Comrod antennas using a standard spring base and 38mm diameter whip
- Six colors available, white, gray, blue, red, green, yellow
- Ten colored rings per bag, suitable for marking five antenna assemblies.

### Mechanical Specifications

Design	Silicone colored rings
Diameter	To fit standard spring base and 38mm diameter whips
Material	UV resistant silicone
Finish	Self color
Temperature range	-55 °C, +71 °C; -67 °F, +160 °F
