

Description

AC input cables are used to connect a ComCompact series power supply to the AC power source. Cable lengths and connector combinations are available to suite the customer requirement. Open-end cables are also available. See table below for standard cable/connector combinations.

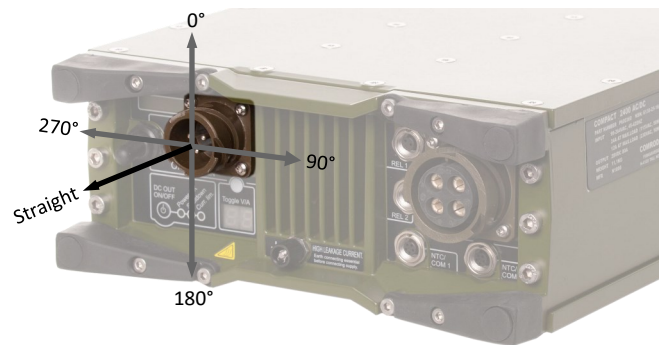

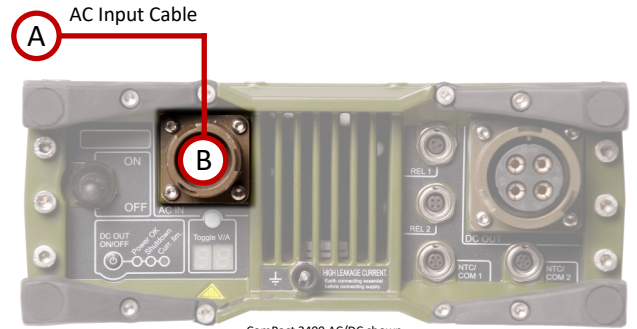

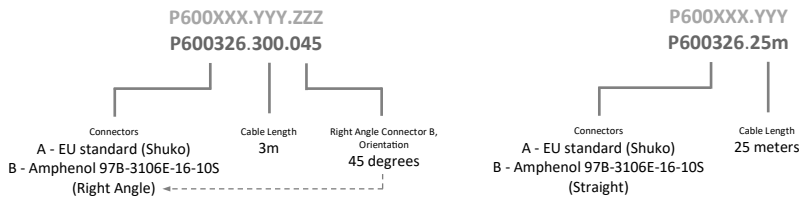

Part Number Configuration - P600XXX.YYY.ZZZ

XXX = connector configuration (see table for options)

YYY = cable length in cm (300 = 3m). For lengths longer than 10 meters use two digits followed by meters unit m, i.e. a 25 meter cable will have suffix 25m

ZZZ = Right angled connector orientation in degrees. Omit ".ZZZ" to order straight connector.

Examples

Cable Orientation
Right angle connector - specify angle (ZZZ)
Straight connector - no specific orientation
