ComPact 2000 DC/AC

2000VA DC/AC Inverter

Summary

- Input: 18-34 VDC
- Output: 120/230 VAC pure sine, 60/50 Hz, 2000VA
- RS-485 bus
  (CAN bus available with future firmware upgrade)
- Stand alone or mounted in 19" rack
- Relay alarm outputs
- RoHS compliant
- IP67
- Order number: P600430
- NSN: 6130-25-162-7531

Description

The ComPact 2000 DC/AC Inverter offers pure sine output at very high efficiency and can operate stand alone or be mounted in 19'' rack system. The RS-485/CAN bus can be used for control, monitoring and setup (CAN bus available with future firmware upgrade). Detailed status and statistics can be retrieved. The bus is available on the signal connectors. The signal connectors also provide alarm relay outputs. The ComPact 2000 DC/AC can be software configured according to customer specification. The firmware is user upgradeable. The ComPact 2000 DC/AC is protected from overvoltage, overcurrent, short circuit, reversed input polarity and over temperature.

Functions	
Over temperature	The unit is protected from over temperature by derating the output current. It shuts down if the temperature continues to rise. The unit automatically starts up again when the temperature drops.
Alarms	Status signals are fed to separate potential free outputs, and are indicated in separate LEDs for: Power OK Unit alarm Overload
Display	The display can be toggled between output voltage, output current and alarm/error codes.
Input voltage	When the input voltage is below the safe operating range, the converter is shut off. When the voltage returns, the converter is turned on again.
Connectors	DC input: Positive: Bayonet, Allied Electronics Corporation MGR 02R 20-2P SQF 36 123 LT 101E RT Negative: Bayonet, Allied Electronics Corporation MGR 02R 20-2P SQF 36 126 LT 101E RT AC output: Bayonet, 97B-3102E-16-10S or equivalent. REL 1/REL 2: 09-0412-30-04 Control: 09-0408-30-03 REM/COM 1/2: 2 pieces. Binder 09-0416-30-05
Grounding	Available in the front and back
Acoustic noise	At ambient temperatures below 45°C the acoustic noise is 45 dBA.
Cooling	Forced air by temperature controlled fan

EMC

Electromagnetic Interference
The power supply meets the requirements of MIL-STD-461G: CE102, RE101, RE102, RS103, CS101, CS114, CS115 and CS116

Electrical systems in vehicles
The power supply meets the requirements of MIL-STD-1275E.

Electrostatic discharge
The power supply meets the requirements of EN 61000-4-2 for ESD.

Environmental

High temperature
Operational
MIL-STD-810G: Method 501.5, Procedure II, +50 °C
Operation at higher ambient will result in reduced power output
Storage
